

SUBJECTS NEEDED FOR **AUDITORY RESEARCH**

Research about hearing **in noisy environments!**

The task involves listening to sounds with an earphone while brain waves are measured from the scalp and cochlea.

Or

Listening to and discerning between different sounds.

Located in the Psychoacoustics Laboratory (room 1217) in the BEHS Building, at the U of U.

Research sessions last 1-3 hours. Testing will be completed over 2-5 sessions.

Flexible scheduling available.

Participants will receive:

- A free hearing test
- \$15 / hour
- Volunteer opportunities are also available.

You are eligible if:

- You have normal or impaired hearing.
- You are 18 years or older.
- You do not have a cochlear implant
